

PROGRAM KIDS CONFERENCE 23th -25th sep 2011
Hotel Rafael Diagonal Port, Lope de vega 4, BARCELONA

Friday 23th of Sep

Registration 13.30 – 15.30PM

15:30 – 16:00PM

Opening, Lone Sorensen

16:00 – 16.30PM

ROOM A

Robert Przybys, Poland, Temprana Reflex Therapy in neurological disorders and syndromes and lerning problems- cases

ROOM B

Gamze Şenbursa, Turkey, Result of research in university of Hacettepe University, treating children with brain injury

16.40 – 17.10PM

ROOM A

Graham Sluter, England, MS in adolescence and adults.

ROOM B

Jolanta Górská, Poland, Neurotherapy cases with Temprana Reflex Therapy.

17. 20- 17.5PM0

ROOM A

Gamze Şenbursa, Turkey, Result of research in university of Hacettepe University, treating children with brain injury

ROOM B

Robert Przybys, Poland, Temprana Reflex Therapy in neurological disorders and syndromes and lerning problems- cases

18.00-18.30PM

ROOM A

Jolanta Górská, Poland, Neurotherapy cases with Temprana Reflex Therapy.

ROOM B

Graham Sluter, England, MS in adolescence and adults.

Saturday 24th of Sep

10.00 -11.00AM

ROOM A

Dr. William Shaw, USA, Multifactorial causes that trigger attention deficit, Behaviour problems, Autistic-spectrum and Developmental Disorders

ROOM B

Elżbieta Żuk-Widmańska, Poland, How to eat to stay healthy and happy? Guidelines for children and adult

11.10-12.10PM

ROOM A

Elżbieta Żuk-Widmańska, Poland, How to eat to stay healthy and happy? Guidelines for children and adults

ROOM B

Dr. William Shaw, USA, Multifactorial causes that trigger attention deficit, Behaviour problems, Autistic-spectrum and Developmental Disorders

Break 12.10-12.40

12.40-13.40PM

ROOM A

Anna Krauze, Poland, Reflexology for Premature Babies and Assistance in Breastfeeding

ROOM B

Irène Elmström, Sweden, The benefits of touch as a way to communicate with children

Lunch break 13.40- 15.00PM

15.00-16.00PM

ROOM A

Lone Sorensen, Denmark, Temprana Reflex therapy; a Brain-Based rehabilitation concept

ROOM B

Mr. Hisashi Machida, Japan, Face acupuncture and Vitamin massage for Infertility & hormonal problems

16.10-17.10PM

ROOM A

Mr. Hisashi Machida, Japan, Face acupuncture and Vitamin massage for Infertility & hormonal problems

ROOM B

Lone Sorensen, Denmark, Temprana Reflex therapy; a Brain-Based rehabilitation concept

17.10 -18.00PM

ROOM A

Piotr Hawryluk, Poland, Therapy Camp and Dolphin therapy

ROOM B

Reflexology for Premature Babies and Assistance in Breastfeeding

Sunday 25th of Sep

9.50 -10. 50AM

ROOM A

Penny Rush, England Facial reflexology at The Charter School, East Dulwich, London

ROOM B

Sue Ricks, Gentle Touch Reflexology is especially beneficial for babies and children.

11.00AM- 12.00PM

ROOM A

Sue Ricks, England Gentle Touch Reflexology is especially beneficial for babies and children.

ROOM B

Penny Rush, England, Facial reflexology at the Charter School, East Dulwich, London

Break 12.00-12-30PM

12.30- 13.30PM

ROOM A

Keiko Igarashi, Japan Aromatherapy and Face Reflexology with enzyme for child skin problems.

ROOM B

Piotr Hawryluk, Poland, Therapy Camp and Dolphin therapy

Lunch break 13.30-15.00PM

15.00- 16.00PM

ROOM A

Irène Elmström, Sweden, The benefits of touch as a way to communicate with children

ROOM B

Keiko Igarashi, Japan Aromatherapy and Face Reflexology with enzyme for child skin problems.

16.00- 17.00PM closing ceremony.

Light lunch and coffee included in the breaks

Lone Sorensen, Denmark

PROFILE

Creator of Facial Reflexology and Temprana Reflex therapy sorensensistem TM current director of the Institute of Reflexology / Facial Internacional. President of the Global Network of Reflexology Association.

About Lone Sorensen and the Institute of Reflexology / Facial Internacional

Therapist educated in Denmark, France, Chile, Germany and Cuba, Lone Sorensen is the creator of Facial Reflexology, as well as the founder of the Institute of Reflexology / Facial Internacional, which is an institution with more than 30 years' service in education and application of reflexology, laser therapy, anatomy. It is also president of the Global Partnership Network reflexology and has important distinctions for their research, as the three titles of nobility conferred by the WHO (World Health Organization) in 2000.

At present, the Institute of Reflexology / Facial Therapies International have advanced in the world in reflexology, thanks to the intensive studies of its founder.

The Institute currently working in following countries; Denmark, Sweden, Finland, Japan, England, Holland, Poland, Czech Republic, Greece, Argentina, Australia, Mexico, Chile, Australia, USA, Canada, Abu Dhabi/ Dubai and Spain.

PRESENTATION TITLE

TIME & DATE:

SATURDAY 24th OF SEP

ROOM A

15.00-16.00PM

ROOM B

16.10-17.10PM

Temprana Reflex therapy; a Brain-Based rehabilitation concept

Temprana Reflex Therapy is brain-based concept based in the latest in specific analyzing and Reflex therapy treatments.

Temprana Reflex Therapy can increase the brain's ability to heal itself by specifically analyzing and reversing neurological impairment. Treatments are non-invasive, safe and do not rely on the use of medication to create changes in neuron activity. Temprana Reflex therapy offer what neurons require:

Stimulation and proper oxygen levels

TEMPRANA REFLEX THERAPY AN INNOVATIVE CONCEPT OF REFLEX THERAPY EFFECTIVE FOR CHILDREN WITH PROBLEMS

Among other benefits, improves cortex problems, individual intellectual insight, calm hyperactivity stimulates learning ability, improved dyslexia, reduce tensions and unrest, and ultimately, improves mental and emotional function.

Anna Krauze, Poland

PROFILE

Anna Krauze is graduated from Midwifery Division of Medical University of Warsaw. In 2010 she completed her post-graduate studies of Children's Developmental Rehabilitation at the Faculty of Psychology at Warsaw University.

She has worked with Reflex therapy sorenssystem tm since 2009, and she completed following courses: Infertility & Hormones, Mother & Baby course and Temparna Reflex Therapy.

She has been a full-time employee of Maternity Hospital, Neonatology Division. She applies reflex therapy to premature babies and their mothers and organizes and teaches Infertility and Mother & Baby courses in Poland. Anna Krauze is specialized in breastfeeding problems with Temparna Reflex therapy.

Anna Krauze is instructor in Maternity Reflex therapy sorenssystem tm in Poland

PRESENTATION TITLE

TIME & DATE:

SATURDAY 24TH OF SEP

ROOM A

12.40-13.40PM

ROOM B

17.10 -18.00PM

Reflexology for Premature Babies and Assistance in Breastfeeding

Reflex therapy is a non-invasive method making it possible for assisting child's development from the first days of his or her life. Applying reflexology to premature babies provides excellent results, restores baby's body balance and relaxes the baby.

Mothers who had reflex therapy treatments were relaxed and noticed an improvement in their well-being.

WORKSHOP: Cases of premature babies and their mothers, who had reflex therapy treatments.

Dr. William Shaw, USA

PROFILE

Dr. William Shaw received a Ph.D. in biochemistry and human physiology from the Medical University of South Carolina. He is board certified in the fields of clinical chemistry and toxicology by the American Board of Clinical Chemistry. He has supervised large endocrinology, nutritional biochemistry, toxicology and immunology departments in positions at the Center for Disease Control (CDC) and Smith Kline Laboratories in Atlanta, GA.

He was Director of Clinical Chemistry, Endocrinology and Toxicology at Children's Mercy Hospital, the teaching hospital of the University of Missouri at Kansas City School of Medicine.

Dr. Shaw is now the Director of The Great Plains Laboratory for Health, Nutrition and Metabolism in Lenexa, Kansas specializing in testing for autism spectrum disorders, AD(H)D, metabolic disorders in adults and children, PDD, hyperactivity, inborn errors of metabolism and adult disorders such as depression, fibromyalgia and chronic fatigue.

He has been invited to participate as a keynote speaker in conferences all over the world.

PRESENTATION TITLE

Multifactorial causes that trigger attention deficit, Behaviour problems, Autistic-spectrum and Developmental Disorders.

TIME & DATE:

SATURDAY 24th OF SEP

ROOM A

10.00 -11.00AM

ROOM B

11.10- 12.10PM

A huge amount of research in the treatments of attention deficit, behaviour problems, Autistic-spectrum and Developmental Disorders, has been published in the last 20 years that documents successful treatment for autism overall or for specific abnormalities common in autism and has connected these treatments to specific biochemical abnormalities common within them. Biochemical abnormalities prevalent in these disorders include calcium deficiency, deficiency of oxytocin, deficiency of vitamin D, and deficiency of cholesterol, heavy metal excess, increased food allergies especially to wheat and milk, increased exposure to toxic chemicals, and others. Specific symptoms will be correlated with each biochemical abnormality.

Environmental neurotoxins and their effect on behavior and learning, especially in vulnerable ages, such as in infants and adolescents.

A high percentage of all children are now exposed to a soup of toxic chemicals. Toxic chemical exposure has been implicated as a major factor in impaired learning ability, attention deficit, hyperactivity, pervasive developmental disorder, and autism. Documentation of common chemicals in the environment that cause developmental delays and their sources will be presented along with methods to prevent exposure and to remove them when exposure has already occurred.

Susan Jane Ricks, England

PROFILE

Sue Ricks began her journey and training into Reflexology in 1990 in the UK. She has developed Gentle Touch™ Reflexology during her research and teaching about the effectiveness of Reflexology for both adults and children. Sue has studied with teachers from around the world. Sue started her training school in 1994 and has since taught both in the UK and internationally.

Sue has written two books, the most recent being The Gentle Touch of Reflexology for Babies and Children. She has been working directly with the Cincinnati Children's Hospital to introduce reflexology techniques into the care and support of their young patients.

Sue is an Honorary Member of The Association of Reflexologists UK, Sue runs the Sue Ricks School of Complementary Therapies based in the UK, teaching Gentle Touch Reflexology, Advanced Reflexology and further Energy and Associated Therapies.

PRESENTATION TITLE

SUNDAY 25TH OF SEP

ROOM B

9.50 -10.50AM

ROOM A

11.00- 12.00PM

TIME & DATE:

Gentle Touch Reflexology is especially beneficial for babies and children.

The techniques are applied with an exceptionally light touch and combine physical, emotional and energetic connections. Exceptional results can be achieved when using the gentle touch of reflexology when working with an infant or child's hands or feet.

The techniques are as appropriate for premature babies as they are for healthy and energetic teenagers as each treatment works to support them uniquely. The subtle stimulation of the specific reflex points in either hands or feet can make a real difference to the child's health, wellbeing and emotional balance.

ROOM A

16:00 – 16. 30PM

ROOM B

17.20- 17.50PM

1-Temprana Reflex Therapy in neurological disorders and syndromes – cases

2-Temprana Reflex Therapy in learning problems – cases

Temprana Reflex Therapy – Lone Sorensen's concept - is called also early therapy. The main objective is significant improvement of the motor and sensory functions deteriorated by brain damage or dysfunction. Temprana therapist knows techniques which can stimulate hearing, speech, visual functions and learning abilities. Temprana helps also to achieve improvement in genetic syndromes. The therapy would not change the gene structure but could remove blockages which do not let the person use all her or his resources. Since the beginning of his education in Sorensensistem™ Robert Przybys treated people suffering from neurological disorders. During two presentations he will describe cases including a therapy of the children with ischemic stroke, spasticity as a result of delivery problem, Louis-Bar syndrome and dyslexia.

Graham Sluter; England

PROFILE

Graham Sluter from Cornwall, UK is a Sorensensistem™ Therapist working 1½ days per week at The Merlin Project, Cornwall's Multiple Sclerosis (MS) therapy centre. Cornwall has the highest percentage of MS per head of population in England. Having nearly lost his life and actually losing his paid lively-hood and family home through a serious cancer illness; Graham's determined journey towards better health includes his constant desire to improve his reflexology knowledge and skills training with Sorensensistem™ Therapies.

The year 2000 saw Graham suffering serious post cancer chemotherapy neurological illnesses, similar to Lupus and MS. Intuitively he realised reflexology was adding an amazing unquantifiable improvement to his persona and quality of life. At that time during his illness the palliative care team at his local Hospice (specialist cancer centre for terminally ill patients) provided foot reflexology as a comforting therapy for patients and carers. In 2002 his consultants and doctors informed him that it would be unrealistic for him to keep trying to return to his former paid full-time employment so whilst he was in remission from testicular cancer he requested that his medical team encourage him to retrain as a volunteer reflexologist.

Graham felt that this would help other patients find inner comfort as he had through the healing art of reflexology.

Today Graham, between many professional activities, is a part of the Merlin project in Cornwall treating MS patients with Temprana Reflex therapy as a part of a research.

Irène Elmström, Sweden

PROFILE

Massage therapist since 1989, from Axelson's Massage School in Stockholm, Sweden. Since then a number of different educations, such as Japanese massage (Ama-massage), Aromatherapy, medicine basic course, facial reflexology etc. Also been part of a project at a hospital in Stockholm as a doula (person helping midwives/parents at hospital/home in labour work) and has been an instructor of infant massage etc.

I was part of the ***Peaceful Touch project*** over a number of years together with Axelsons massage school, where massage was used as a method to create a better platform for children to learn and act in a more positive and less aggressive way.

As an organizer and instructor of ***infant massage***, I have met many parents and little babies, each of them with their own personality and needs. At the ***Doulaproject***, my part was to support the parents before/under/after labour and of course massage was a beautiful way to help. Communication two-in-one!

I ***run basic courses*** in massage together with Axelsons massage school since 1999.

Nowadays I'm also a therapist of ***Facial Reflexology*** Sorensensistem tm. In ***my own clinic*** since many years I use different treatments such as massage, aromatherapy, facial reflexology etc, and it happens that parents come for a special session learning how to massage their own child.

15.00- 16.00PM

The benefits of touch as a way to communicate with children

I have worked with different kinds of manual therapies on grown-ups and children over the years. From mother and babies (not even born) in the "doula-project" up to elderly people. Working with so many people, it always strikes me; how do we communicate, is it only by words? My absolute believe is that communication and meetings are taken place on several different layers at the same time, on a physical, physiological, emotional and spiritual way. When we touch someone we create a bond to that person, something that we can take advantage of in the process of working with children (our own or others). We live in a society full of stress in different ways and it is necessary to find methods and moments to slow down, so listening, communication, learning and empathic skills can take place. Massage and peaceful touch is a beautiful way to do it. With all the studies that clearly show on the benefits of a positive touch, there is nothing to wait for!

Our continued objectives are: To help support the mental, physical, emotional and spiritual well-being of the students.

We aimed to help improve the following:

- Self esteem and confidence
- Capacity to learn by improving attention span and concentration
- Calm hyperactivity by helping to reduce tension and anxiety

We also aimed to support and address the emotional needs and aspects of the children's development through puberty.

Summary of students treated
